CLEVERTECH STRETCH WRAPPING MACHINES

PF 80 WRAPPING TECHNOLOGY

The wrapping cycle is carried out by a rotating ring holding a film-roll. In addition to the complete cycle, it is possible to carry out a downward/upward cycle only or wrapping the top or the bottom of the pallet.

- Production standard package reaches a speed of **40 RPM**;
- The “speed increase” package reaches a speed of **55 RPM**;

PF 80 MAIN FEATURES

- Powered pre-stretch ration up to **350%**;
- Film-roll up-down stroke speed variable by Inverter;
- Stretchable film tension adjustment;
- Photocell for automatic pallet height detection;
- Visual display for fault signaling and cycles times setting;
